Bijasu (Bij- seed; asu- bearer) is the Sanskrit word for our Mother Earth. We in BARL believe improving soil health is tantamount to successful agriculture, so we are improving traditional approaches to organic farming by state-of-art scientific techniques. We perform R&D activities on various organic formulations that are derived from wastes from various industries. In this manner we reduce biological pollution and at the same time produce highly efficient organic manures that can increase crop yield. For instance, our latest technology is derived from wastes from cattle and dairy industries; 1L of our product suffice 1 acre of vegetable crop in a single application.</p>	<p data-bbox="1058 394 1394 573">To develop and formulate organic fertilizers of microbial, animal and plant sources to enhance crop productivity.</p> <p data-bbox="1058 613 1394 719">To understand the swiss dairy industries and waste management system.</p> <p data-bbox="1058 760 1394 898">To identify potential collaborators and business partners in Switzerland and India.</p> <p data-bbox="1058 938 1394 1117">Public advocacy center for agriculturists rural sector and aiding in the skill development and welfare of women in agriculture</p>	<ul data-bbox="1478 394 1814 833" style="list-style-type: none"> • Cattle farms • Dairy Industry • Fruit processing industries • Rural farmers • Urban farmers, terrace gardeners and nurseries
