

Researcher	Your startup / product / service	Objective	Potential Customer/End User
 <p data-bbox="298 847 596 1136">Joshitha C PhD Research Scholar(FT), Dept of ECE, SSN College of Engineering, Kalavakkam, Chennai, India.</p>	<p data-bbox="634 354 1033 821">The product is a Insulin delivery smart microsystem which is a combination of non-invasive/invasive blood glucose monitor with automated Insulin delivery MEMS based system. The novelty of proposed system linked with its pump-less drug dosage control module along with the drug flow control module.</p> <p data-bbox="634 847 1033 1276">The product monitors patient's blood glucose level using blood glucose sensor. Glucose sensor output is processed to actuate SMA coil in drug dosage control module. Once the drug is dispensed from the microreservoir, flow control module directs the drug in microchannel to microneedle array.</p>	<p data-bbox="1054 354 1400 496">To meet the experts in the field of interest for improvisation of product features</p> <p data-bbox="1054 535 1341 639">To gather information about the expectable investors in India</p> <p data-bbox="1054 678 1371 821">To find out the best procedure to convert the research to commercial product</p> <p data-bbox="1054 860 1400 1042">To gain more ideas about intellectual property rights of inventor and how to use it for marketing the product</p> <p data-bbox="1054 1081 1373 1153">To learn self status as an entrepreneur</p>	<ul data-bbox="1474 354 1740 574" style="list-style-type: none"> <li>• Diabetic patients</li> <li>• Hospitals</li> <li>• Pharmaceutical industries</li> </ul>
